DATO musical instruments for future generations

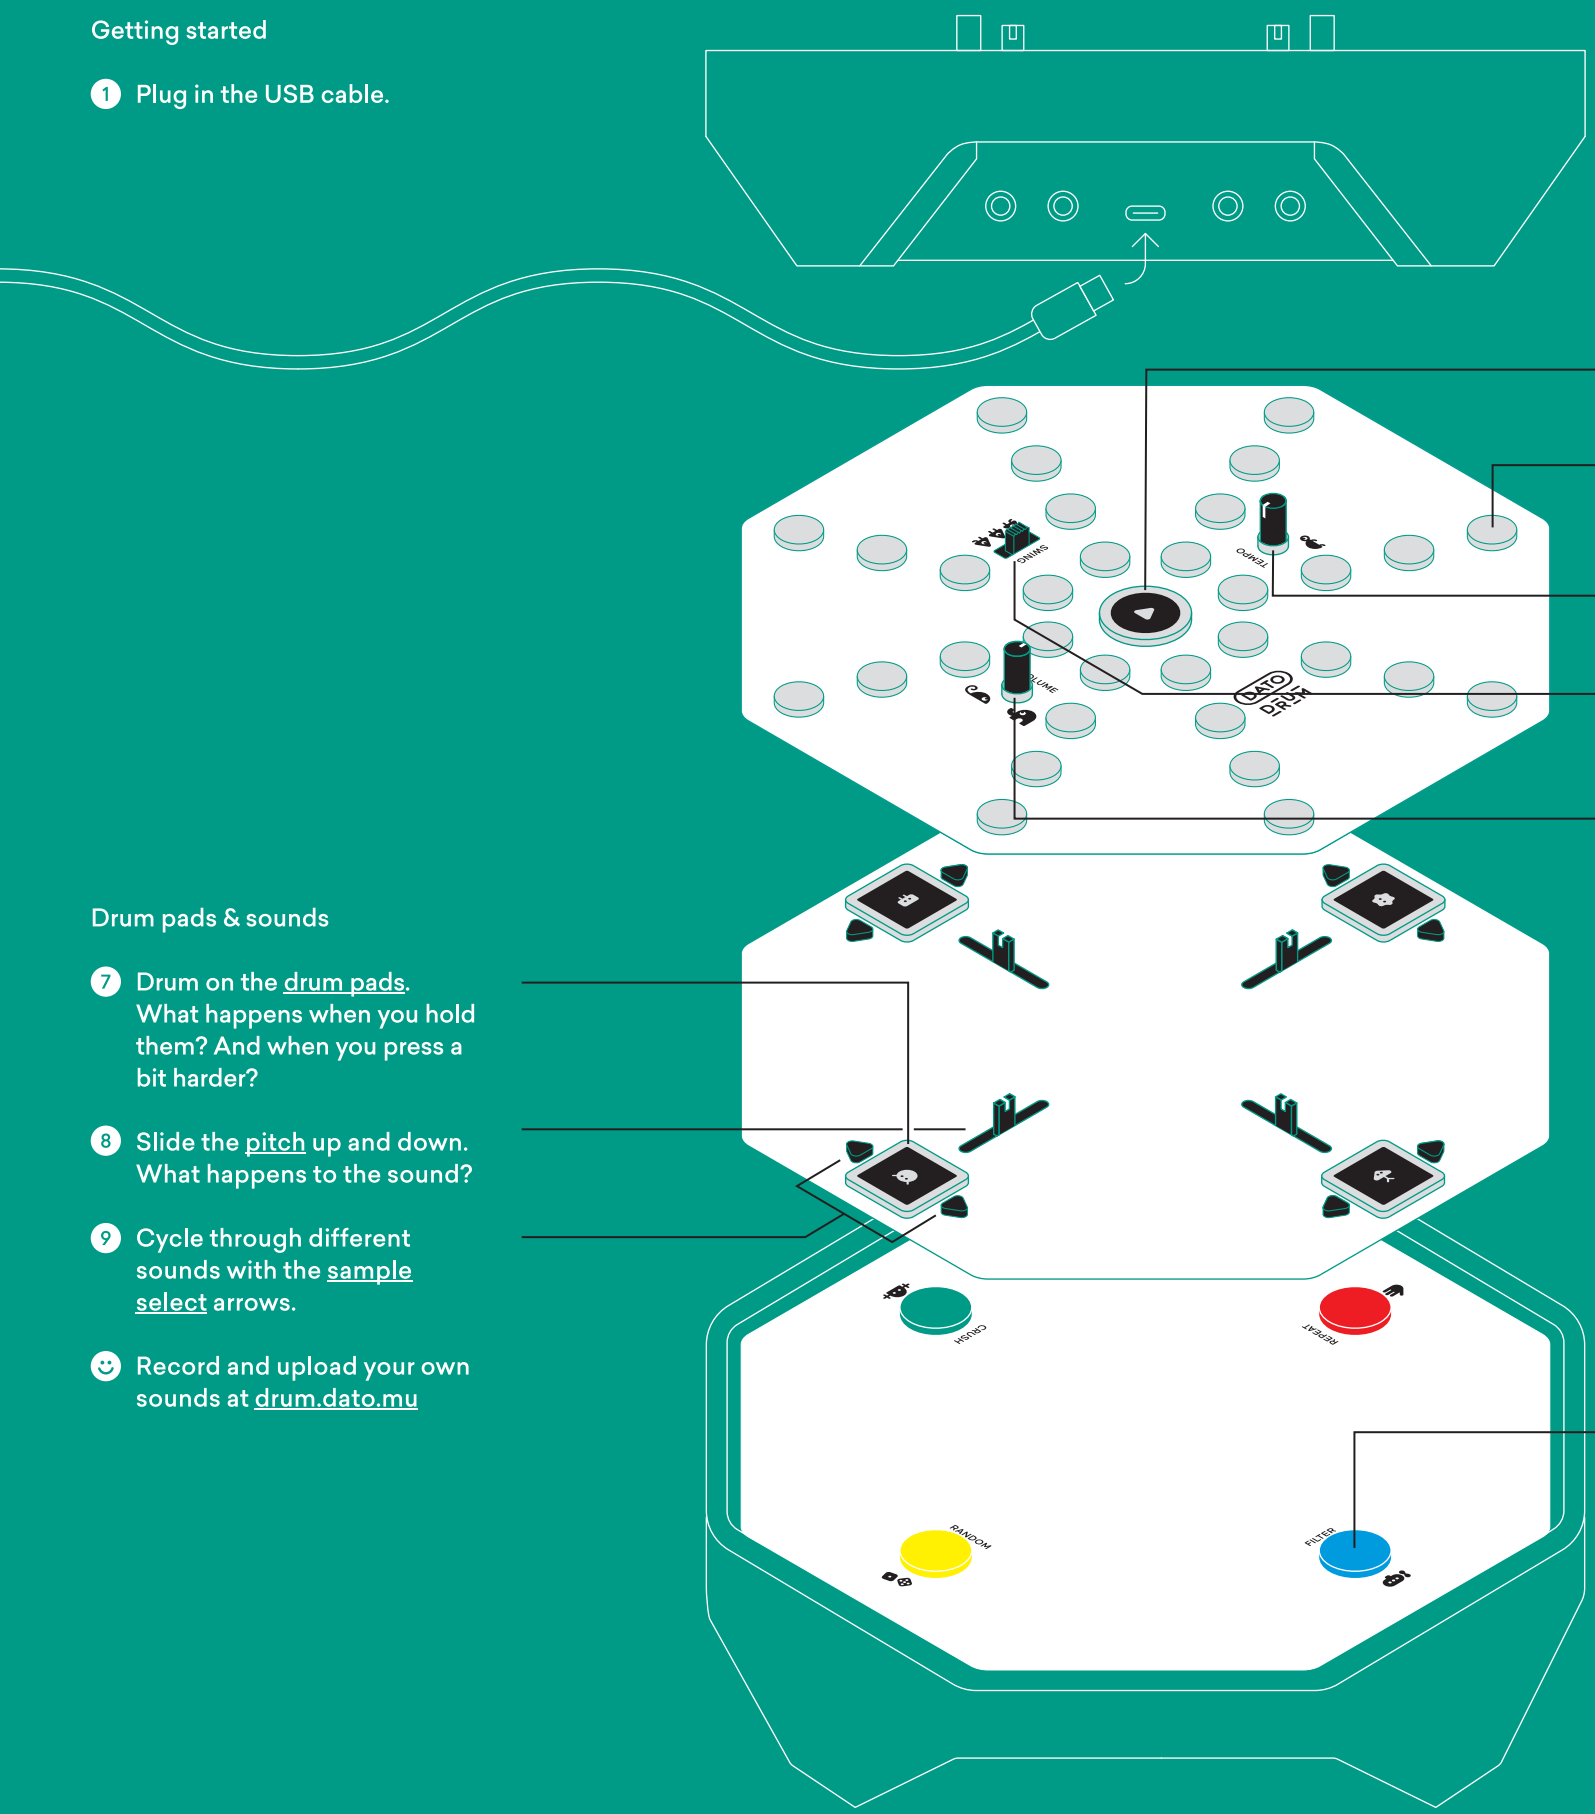

DATO DRUM

The best way to explore Dato DRUM is to start pressing buttons. You can't do anything wrong!

Follow the steps below to find out all about Dato DRUM.

Getting started

1. Plug in the USB cable.

Sequencer & volume

2. Press the play button to start the beat.
3. Press the sequencer buttons to turn them on or off. How does it change your rhythm?
4. Turn the tempo. How fast can it go? How slow?
5. Try swing (left and right) and no swing (middle). Which one sounds groovy?
6. Too quiet or too loud? Change the volume.

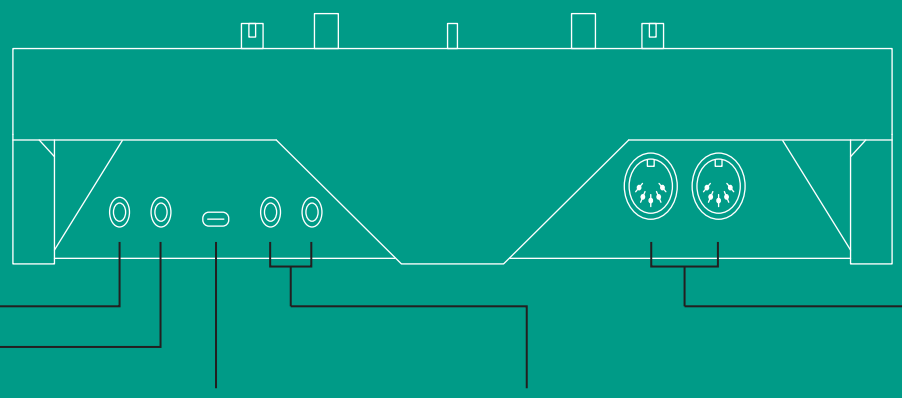

Drum pads & sounds

7. Drum on the drum pads. What happens when you hold them? And when you press a bit harder?
8. Slide the pitch up and down. What happens to the sound?
9. Cycle through different sounds with the sample select arrows.
10. Record and upload your own sounds at drum.dato.mu

Effects

10. Hold the effects and hear what they do. Try pressing them softly and a bit harder. What changes?

Connectivity

Audio in

Plug in other instruments or sound sources to play them on the DRUM speaker.

Stereo and mono cables both work.

Audio out

Connect headphones or speakers.

Stereo and mono cables both work.

USB-C

Power the DRUM. You can use any USB power source.

Connect to your device for USB MIDI, updating samples and firmware.

5V DC USB-C
1 A minimum

Sync in & out

Hook up the SYNC OUT of the DRUM to the SYNC IN of the DUO to match the tempo.

Works with other Sync instruments as well.

3.3V pulse
2 PPQN

MIDI in & out

Sends and receives tempo, continuous control and notes on MIDI channel 10.
